📁 [portfolio](#)

Key Achievements

- Built multiple data analysis and visualization projects using Python, SQL, and real-time datasets.
- Strong mathematical background with expertise in data analysis, and computational problem-solving
- Served as the Club Head of the Online Promotions Club at college for one year.
- Active open-source contributor with projects focused on data analytics, APIs, and AI models.

Certifications

Getting Started with Artificial Intelligence - AI Foundations (2025)
TCS iON Career Edge - Young Professional - Professional Development (2024)
Software Engineering Fundamentals - Electronic Arts Job Simulation (2024)

Technical Skills

- Proficient in **Python for Data Analysis** including data manipulation using Pandas and NumPy.
- Strong knowledge of **SQL** (joins, aggregation, subqueries, data extraction).
- Familiar in **Exploratory Data Analysis (EDA)** and statistical data interpretation.
- Skilled in **data cleaning, preprocessing, and data wrangling**.
- Proficient in **Data Visualization** using Matplotlib and Seaborn.
- Advanced **Excel skills** including Pivot Tables, VLOOKUP, dashboards, and charts.
- Familiar with **Machine Learning basics** and model building concepts.
- Knowledge of **Natural Language Processing (NLP)** techniques.
- Familiar with **API data extraction** and JSON data handling.
- Familiar with **Git, GitHub** for version control and **Github Copilot**.
- Strong **analytical thinking and data-driven decision-making**.

Projects

Real-Time Weather Data Dashboard <i>API Data Extraction, Data Analysis, Visualization</i> Live	2025
• Collected real-time weather datasets using public APIs and performed data extraction and preprocessing • Analyzed structured data to identify trends such as temperature variations and weather patterns. • Designed a data visualization dashboard to present insights using charts and structured UI components.	
Nova – AI Data Interaction Assistant <i>Data Processing, API Integration, Real-Time Dataset Handling</i> Live	2026
• Processed user queries and external API responses to structure and manage real-time datasets. • Implemented data handling logic to improve response accuracy and information retrieval efficiency. • Managed cloud-based structured data storage using Firebase for real-time analytics usage.	
AI Resume Analyzer Using Python, NLP and Streamlit <i>Machine Learning Projects, AI Models</i> Live	2026
• Developed an AI-powered application to analyze resumes and match them with job descriptions. • Used NLP techniques for resume parsing, keyword extraction, and similarity scoring. • Built an interactive dashboard using Streamlit for real-time resume analysis. • Implemented machine learning models to improve job-role matching accuracy.	

Education

Galgotias College of Engineering and Technology

Greater Noida, India

Master of Computer Applications (MCA) - Computer Programming

September 2024 – October 2026

- Specialization: Scalable Software Systems, Algorithms, and Data Structures
- Relevant Coursework: Programming, Database Systems, Software Engineering

Dr. Bhim Rao Ambedkar University

Etah, India

Bachelor of Science (B.Sc.) in Mathematics

2019 – 2022

- Strong foundation in analytical thinking, problem-solving, and computational mathematics
